1. The ADRION Project Website

This manual provides you with steps and instructions on how to create and edit your project website. The project websites are integrated into the Programme website using Content Management System.

The project coordinator will receive from Adrion the necessary data to access the website. In detail, project website URL, username and password.

2. Content instructions

As project partner, you are able to write content for your website which is visible to the public. Please note that even though the project websites are hosted on the ADRION Programme website, you are responsible for what you write, so please be accurate, fair and ethic about the information and message you want to pass across.

3. Contacts for technical assistance

Technical Assistance: info@interregadrion.eu.

Insert the following wording in the subject line of the email: "Technical assistance for ADRION project websites".

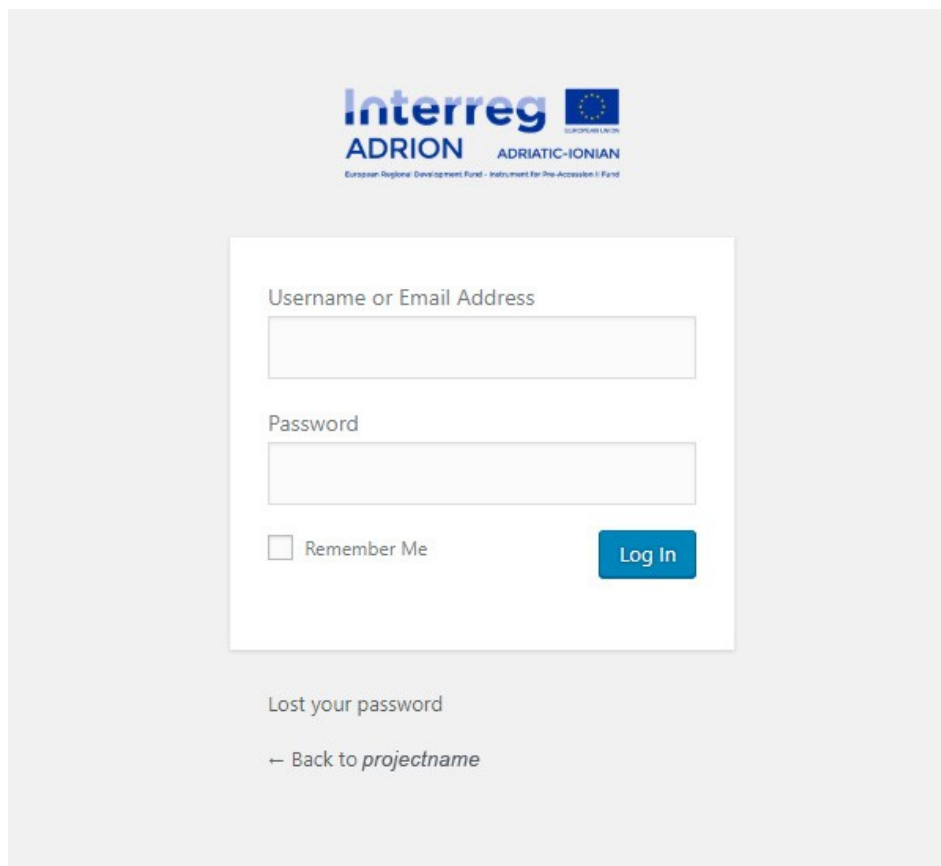

4. Login

To login, go to

<https://projectname.adrioninterreg.eu/login>

Change *projectname* with the name of the project.

Insert username and password in the login as shown here below.

The screenshot shows the login interface for the Interreg ADRIATIC-IONIAN project. At the top, the logo for Interreg ADRIATIC-IONIAN is displayed, featuring the text 'Interreg' in blue, 'ADRION' in blue, and 'ADRIATIC-IONIAN' in blue, with the European Union flag to the right. Below the logo, the text 'European Regional Development Fund - Instrument for Pre-Accession II Fund' is visible. The main login form is a white box with a light gray border. It contains two input fields: 'Username or Email Address' and 'Password'. Below the 'Password' field is a checkbox labeled 'Remember Me'. To the right of the checkbox is a blue button labeled 'Log In'. Below the login form, there is a link 'Lost your password' and a link '← Back to projectname'.

How to change your password

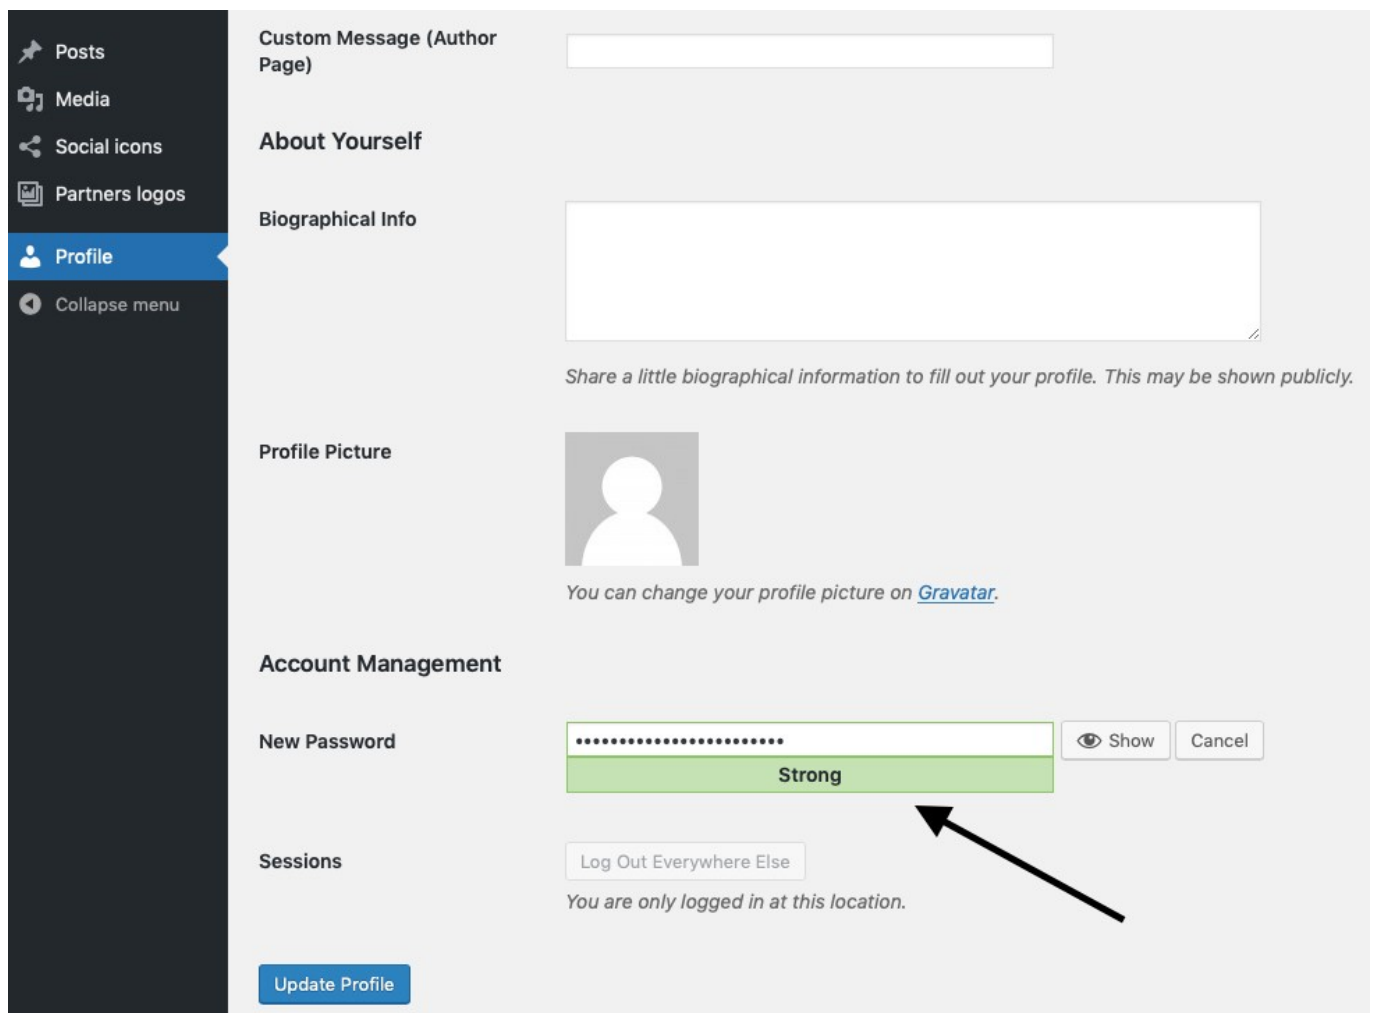

After the first login, we suggest to change the password.

Once you are logged in, go to **Profile** on left sidebar menu.

In the Profile screen, scroll down to the **New Password** section and click Generate Password button.

If you want to change the automatically generated password, overwrite it in a new password in the box provided (The new password must be at least 8 characters long. It must contain at least one character that is not a letter, such as a digit, one UPPERCASE letter and one lowercase letter). The strength box will show how good (strong) your password is.

Click the **Update Profile** button. Your new password takes effect immediately.

The screenshot shows the 'Profile' page with a dark sidebar on the left containing links: Posts, Media, Social icons, Partners logos, Profile (highlighted), and Collapse menu. The main content area has sections: Custom Message (Author Page), About Yourself, Biographical Info (with a text box and a note to share information), Profile Picture (with a placeholder and a link to Gravatar), Account Management, and Sessions. In the 'New Password' section, there is a password input field filled with dots, a 'Show' button with an eye icon, and a 'Cancel' button. Below the input field is a green bar with the word 'Strong' in white. A black arrow points to this bar. At the bottom of the 'Sessions' section is a 'Log Out Everywhere Else' button and a note: 'You are only logged in at this location.' A blue 'Update Profile' button is at the bottom left of the main content area.

How to change your e-mail address

Upon successful login you have to change you email address.

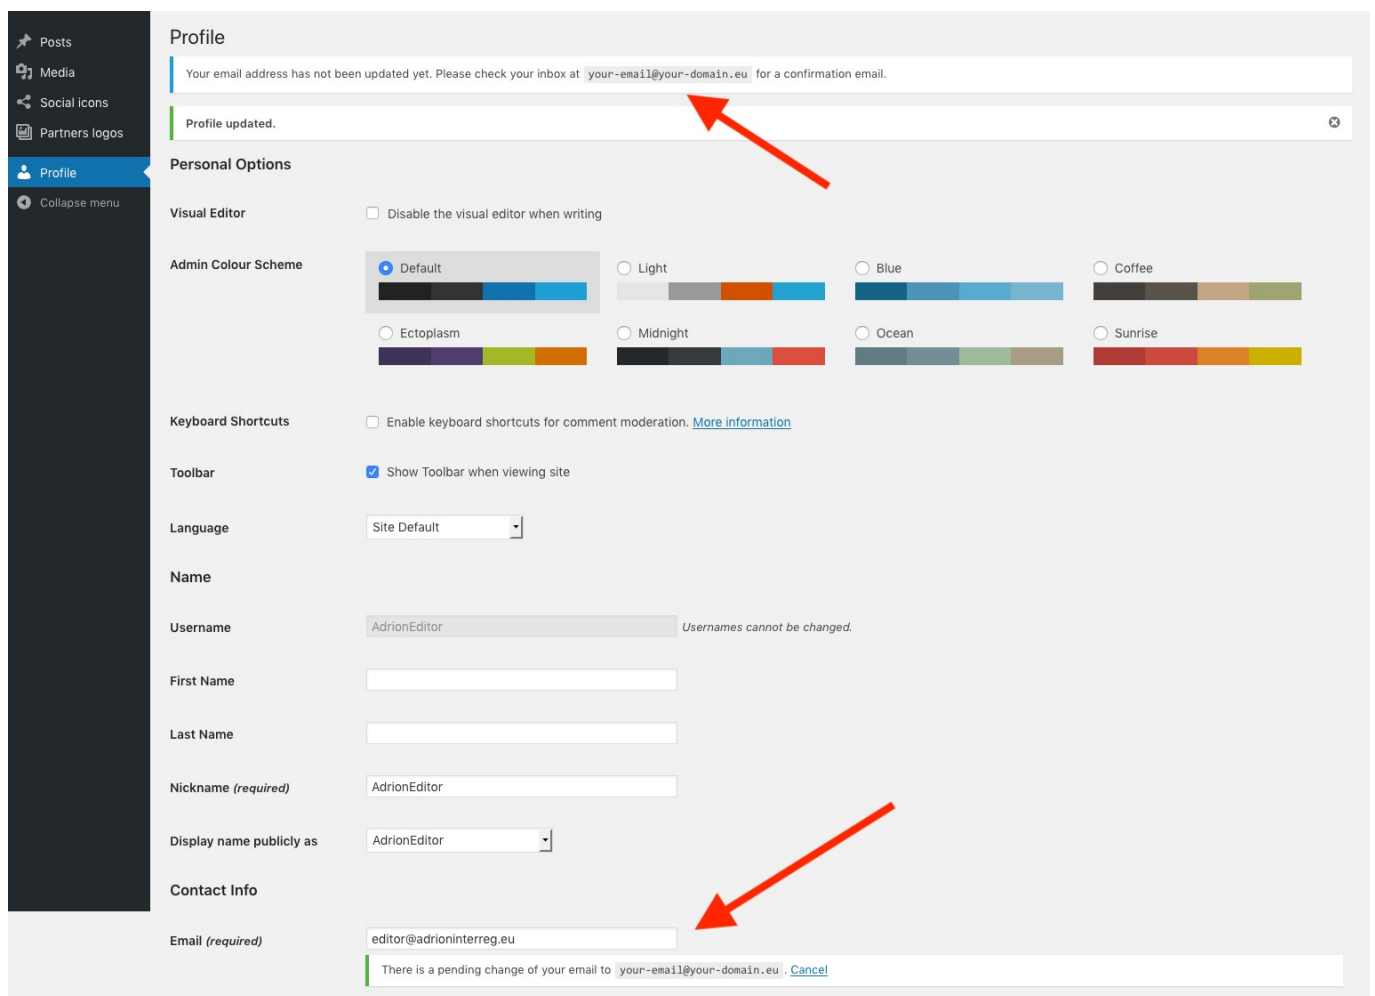

Go to **Profile** on left sidebar menu.

In the Profile screen, scroll down to the **Contact Info** section and fill out the **Email** field with your email address.

Click the **Update Profile** button. Your email address has not been updated yet.

Please check your inbox at *yourname@yourdomain.eu* for a confirmation email.

If you do not receive the confirmation message within a few minutes, please check your Junk/Spam E-mail folder just in case the confirmation email got delivered there instead of your inbox. If so, select the confirmation message and click Not Junk/Spam, which will allow future messages to get through.

The screenshot shows the 'Profile' page with a sidebar on the left containing links to Posts, Media, Social icons, Partners logos, Profile (selected), and Collapse menu. The main content area is titled 'Profile' and contains a message: 'Your email address has not been updated yet. Please check your inbox at *your-email@your-domain.eu* for a confirmation email.' Below this is a 'Profile updated.' notification. The 'Personal Options' section includes 'Visual Editor' (with a checkbox to 'Disable the visual editor when writing'), 'Admin Colour Scheme' (with various color options like Default, Light, Blue, Coffee, Ectoplasm, Midnight, Ocean, Sunrise), 'Keyboard Shortcuts' (with a checkbox to 'Enable keyboard shortcuts for comment moderation'), and 'Toolbar' (with a checkbox to 'Show Toolbar when viewing site'). The 'Language' is set to 'Site Default'. The 'Name' section includes 'Username' (AdriónEditor, with a note 'Usernames cannot be changed.'), 'First Name', 'Last Name', 'Nickname (required)' (AdriónEditor), and 'Display name publicly as' (AdriónEditor). The 'Contact Info' section includes an 'Email (required)' field with the value 'editor@adrióninterreg.eu' and a confirmation message: 'There is a pending change of your email to *your-email@your-domain.eu*. [Cancel](#)'. Two red arrows point to the confirmation message at the top and the email field at the bottom.

Confirmation message example:

Hi AdrionEditor,

You recently requested to have the email address on your account changed.

If this is correct, please click on the following link to change it:

<https://youprojectname.adrioninterreg.eu/wp-admin/profile.php?newuseremail=8749232312efc1706988077fc5f26a4e5b2>

You can safely ignore and delete this email if you do not want to take this action.

Click on the link and your new email address is updated.

Forgot your password?

If you do not remember your password, on **Login** page Click on the **Lost your password?** Link.

You will be taken to a page to put in some details.

Enter your username and click the **Get New Password** button.

Wait as your new password is emailed to you.

Once you get your new password, login and change it to something you can *remember* on your profile page.

5. Editable contents

The project partners will be able to publish posts in 4 sections (categories) listed below:

News: news related to the project may be published in this category.

Events: events related to the project may be published in this category (the events published in this category will be automatically loaded on the Interreg ADRION program official website. An editor will check if the event can be published) .

Activities: activities related to the project may be published in this category.

Library: documents related to the project may be published in this category.

NOTE:

Use only the 4 existing categories (News, Events, Activities, Library).

Do not change the names of existing categories. By changing the name of one of the 4 existing categories (News, Events, Activities, Library) the related website pages would no longer be visible.

Even if you can add new categories or tags, these will not be visible on the website.

Sample posts

Within the post section, there are sample posts for each of the existing categories. These posts can be edited and / or deleted.

If you wish to keep them as an example, you can edit the post status and save it as a draft in the Publish Panel. Post in draft status are not visible in the website.

Overview

Overview

Project Summary

The Adriatic-Ionian area is heavily undermined by earthquakes. Each country has developed laws and norms, methods, techniques and expertise for tackling earthquake risks and for reducing seismic vulnerability of the built environment. Nevertheless, in urban areas and particularly in historical centers they remain high.

ADRISEISMIC overall objective is to exchange and systematize knowledge and practices in tackling the reduction of the seismic vulnerability of the built environment in Project Partner countries, to harmonize planning and management of emergencies after seismic events and the post-earthquake phase, in order to drastically improve the approaches for dealing with and to secure the reduction of seismic vulnerability among ADRION regions. The main focus areas are the historical urban centers and historical squares and their surrounding buildings, conceived as symbol of local identity and socio-economic cores for the ADRION settlements.

By building upon the available knowledge and thanks to territorial cooperation, ADRISEISMIC will develop new integrated approaches to innovate and harmonize the normative, technical and training frameworks in the ADRION area, providing ready-to-use methods, tools and procedures that will be integrated into the existing policies and practices, thus strengthening local responses and reducing vulnerability to natural hazards.

The partnership involves 8 partners from 6 countries (IT, HR, SI, GR, AL, RS). It includes municipalities, regional authorities and development agencies as well as universities, research and training centers. 13 Associated Partners have been involved, and more stakeholders have declared their interest and are willing to be involved in project local activities.

ADRISEISMIC main outputs will consist of 2 Action Plans and the creation of a transnational cooperation network.

Bulk Actions Apply

12 items

Posts

Advises total number of Posts, how many are Mine, Published, Scheduled, in Draft or in the Bin

Posts

Hovering the cursor over each row will show you various options you can perform

Posts

Perform actions on multiple Posts at once by selecting the appropriate checkboxes & then choosing an action from the Bulk Actions dropdown & clicking Apply

At the top of the page you can view how many Posts in total you have in your website, how many of these have been published by you and how many are Published, Scheduled, Sticky, Pending, in Draft or in the Bin.

When hovering your cursor over each row, a few links will appear beneath the Post title.

Edit – Allows you to edit your Post. You can edit a post also clicking on the Post title.

Quick Edit – Allows you to edit basic Post information such as Title, Slug, Date plus a few other options.

Bin – Allows you to send the Post to the Bin. Once the Bin is emptied, the page is deleted.

View – Allows you to open view the content of the Post. If the Post has not been published yet, this will display *Preview*.

Next to each Post title there is a checkbox. This allows you to perform an action on multiple items at once.

To do that, check the relevant post(s) and select either the *Edit* option or the *Move to Bin* option from the Bulk Actions dropdown list and then click the *Apply* button. The *Edit* option will allow you to edit the Categories, Tags, Author. The *Move to Bin* option will move the selected items to the Bin.

You can also filter the pages that are displayed using the dropdown lists and the *Filter* button.

Adding a New Post

To add a new Post, get over the *Posts* menu option in the left-hand navigation menu and in the fly-out menu and click the **Add New** link. Alternatively, click the **Posts** menu option and then click the **Add New** link underneath, or the **Add New** button at the top of the page.

You should see a page similar to this screenshot below.

The screenshot shows the 'Add a New Post' interface. On the left is a dark navigation sidebar with options: Posts, All Posts, Add New, Categories, Tags, Media, Social icons, Partners logos, Profile, and Collapse menu. The main content area is titled 'Add a New Post' and includes a title input field, an 'Add Media' button, and a rich text editor with 'Visual' and 'Text' tabs. Below the editor is an 'Excerpt' field and a 'Word count: 0' indicator. On the right side, there are several panels: 'Template Layout' with a dropdown and 'OK' button; 'Publish' with 'Save Draft' and 'Preview' buttons, and status/visibility options; 'Categories' with a list of categories and an 'Add' button; and 'Featured Image' with a 'Set featured image' link. Six callout boxes provide additional information: 'Editor Toolbar' explains the menu bar buttons and Visual/Text tabs; 'Editor' states it's where content is added; 'Excerpt' explains they are summaries for the post list; 'Publish Panel' explains saving as draft or publishing; 'Categories' explains they define the page the post is visible on; and 'Featured image' explains it's shown as a preview in the post list.

Editor Toolbar

Your Post can be styled using the various menu bar buttons. These buttons are also used to add links, upload & insert images, media files & other documents. Using the *Visual* & *Text* tabs, you can switch between the Visual editor or the HTML editor.

Editor

This is the Editor where your Post content is added

Excerpt

Exerpts are post summaries which are shown in the post list on the front of the site

Publish Panel

Once your content is added, you can publish your Post or save it as a draft

Categories

Categories define on which page your Post will be visible once published

Featured image

Featured image is shown on post list as preview image

You need to set up:

Title: Post title, it will be the title shown on the Front, both in the post list and in the post page.

Excerpt: Write a short summary of the post, it will be shown in the Post list.

Category: Categories indicate on which page your post will be visible. You can choose more than one, but you have to select at least one, otherwise the post will not be visible on the website.

Post content: Insert it by writing down contents in the Visual Editor.

Adding content with the Visual Editor

The editor used to enter content into your Page or Post is very easy to use. It's much like using a regular word processor, with toolbar buttons that allow you to Bold (**B**) or Italicize (*I*) text or enter in Headings (**Paragraph** ▼) or bullet points ( ). You can even use most of the basic keyboard shortcuts used in other text editors. For example: *Shift+Enter* inserts a line break, *Ctrl+C/Cmd+C* = copy, *Ctrl+X/Cmd+X* = cut, *Ctrl+Z/Cmd+Z* = undo, *Ctrl+Y/Cmd+Y* = redo, *Ctrl+A/Cmd+A* = select all, etc. (use the *Ctrl* key on a PC or the *Command* key on a Mac).

At the top of the editor there are two tabs, *Visual* and *Text* ( ). These switch the editor view between the *Visual Editor* and the *Text editor*. The Text view will enable you to view the HTML code that makes up your content. For the advanced users this can be helpful but for those not familiar with HTML tags, it's not recommended. If you need to insert an embed from another website, e.g. a Youtube or Vimeo video, you have to paste the code in the Text view.

When you create a new Post, first enter your title in the top entry field where it displays *Enter title here*. After moving the cursor down to the editor a new Permalink is created for your page. Permalinks are the permanent URL's to your individual Posts, Pages, Categories etc.. Though not usually necessary, you can manually edit your permalink by clicking on the actual permalink (the part after the domain name with the yellow background) or by clicking the Edit button next to it. Once you have modified it, click *Ok* to save or *Cancel* to cancel your changes.

At the top of the editor, there are numerous formatting buttons. Clicking the *Toolbar Toggle* button () will show or hide a second line of formatting buttons which gives you extra functionality. The editor buttons perform the following functions:

	Add Media – Used to upload and insert media such as images, audio, video or documents
Paragraph ▼	Style – Used to format the Page text based on the styles used by the current Theme
B	Bold – Bold text
<i>I</i>	Italic – Italicise text
	Bulleted List – Create an unordered (bullet point) list
	Numbered List – Create an Ordered (numbered) list
	Blockquote – Used as a way of showing a quote.
	Align left – Align text to the left
	Align Center – Align text in the center of the page
	Align Right – Align text to the right
	Insert/edit link – Used to create an html link to another page or website. If no text is selected first, the URL that you enter will also be used for the link text
	Insert Read More tag – Inserts the <i>More</i> tag into your Page. Most blogs only display a small excerpt of a Post and you are required to click the Post title or a “Read more...”

link to continue reading the rest of the article. When you insert a “More” tag into your Post, everything prior to the tag is considered as this excerpt.

Toolbar Toggle – Used to show or hide the second row of formatting buttons on the editor toolbar

Distraction Free Writing – Clicking this button will enlarge the editor so that it fills the browser window. Clicking the *Exit fullscreen* link at the top of the screen will reduce it back to its original size

Strikethrough – Add a strikethrough to your text

Horizontal Line – Inserts a horizontal line into your page

Text color – Use to change the color of text

Paste as Text – Copying & pasting text from other sites or word processors sometimes leaves the text formatted differently to what you were expecting. The reason for this is that quite often the html tags or codes that formatted the original text are pasted along with the text itself. To avoid this, Paste as Text will strip all these formatting and html tags. The Paste as Text option acts like a toggle, staying active until you turn it off by clicking the button again or until you save your page content

Clear formatting – Use this to remove all the formatting (eg. Bold, Underline, text color etc..) from the highlighted text

Special character – Used to insert special characters not easily accessible via the keyboard (eg. ¼, ½, ¾, ©, €, Ö etc..)

Decrease indent – Removes one level of indenting

Increase Indent – Indents text by one level

Undo – Undo your last action

Redo – Redo your last action

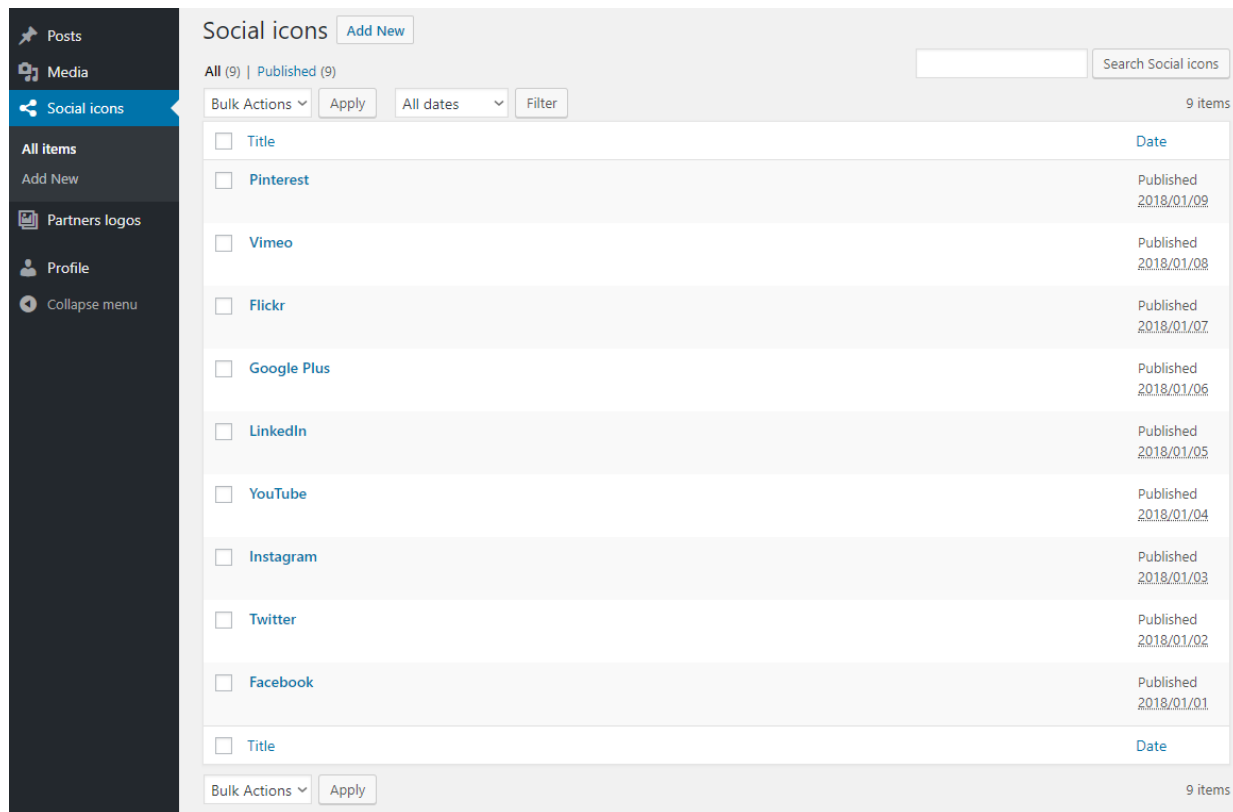

Keyboard shortcuts – Displays information about the WordPress visual editor along with keyboard shortcuts

Visual/Text – Switches the editor view between the Visual Editor and the Text editor. The Text view will enable you to view the HTML code that makes up your content. For the advanced users this can be helpful at times but for those not familiar with HTML tags, it's not recommended

7. Social Icons

In this section you can set the Social Networks which will be displayed on *Project Overview* page. You will find 9 predefined icons, you can add a new one or move to Bin the ones you don't want to use. The **Social Icons** screen will look like this screenshot below.

At the top of the page you can view how many Social icons in total you have in your website, how many have been published by yourself or Published, Scheduled, Sticky, Pending, in Draft or in the Bin.

Getting your cursor over each row, a few links will appear beneath the Social icon title.

Edit – Allows you to edit your Post. You can have the same clicking on the Social icon title.

Quick Edit – Allows you to edit basic Post information such as Title, Slug, Date plus a few other options.

Bin – Allows you to send the Post to the Bin. Once the Bin is emptied, the Social icon is deleted.

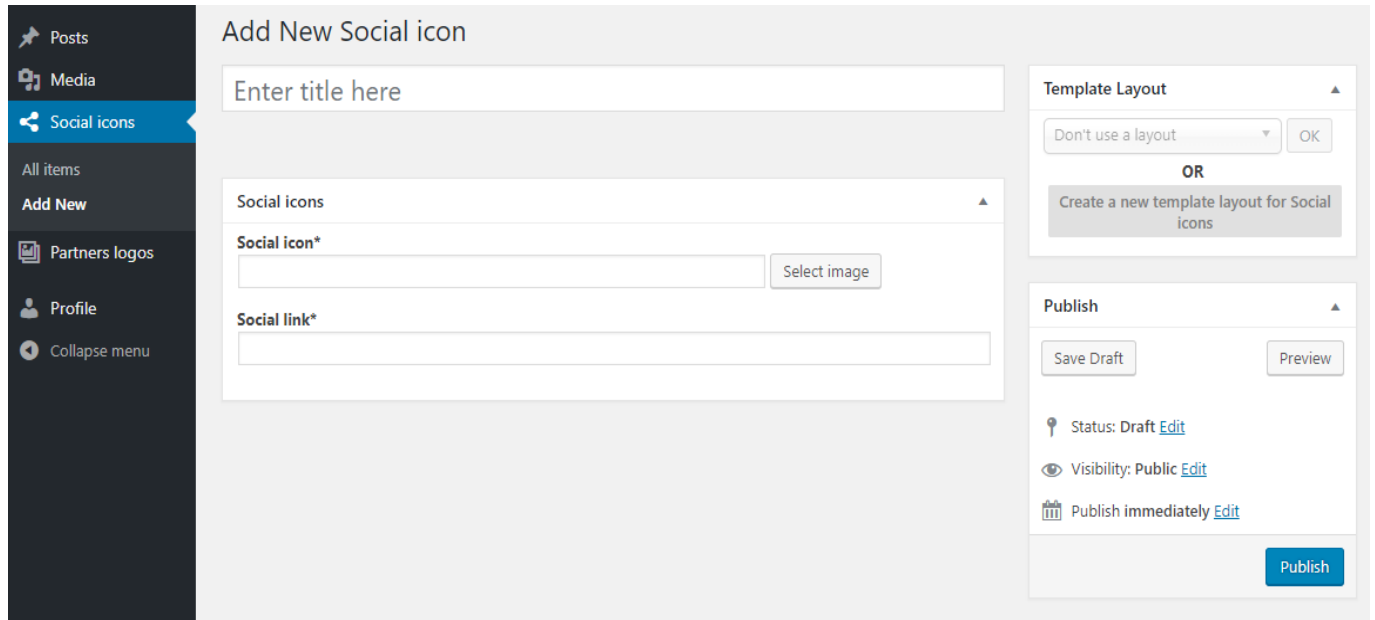

View – Allows you to display the Social icon. If the Social icon has not been published yet, this will display *Preview*.

Next to each Social icon title there is a checkbox. This allows you to perform an action on multiple items at once. You simply check the Social icon that you would like to affect and then from the Bulk Actions dropdown select either the *Edit* option or the *Move to Bin* option and then click the *Apply* button. The *Edit* option will allow you to edit the Categories, Tags, Author. The *Move to Bin* option will move the selected items to the Bin. You can also filter the pages that are displayed using the dropdown lists and the *Filter* button.

Adding a New Social Icon

To add a new Social Icon, get over the *Social Icon* menu option in the left-hand navigation menu and in the fly-out menu, click the **Add New** link. Alternatively, click the *Social icon* menu option and then click the **Add New** link underneath, or the **Add New** button at the top of the page.

The page will appear like the screenshot below.

The screenshot shows a dashboard interface for adding a new social icon. On the left is a dark sidebar with navigation links: Posts, Media, Social icons (highlighted), All items, Add New, Partners logos, Profile, and Collapse menu. The main content area is titled 'Add New Social icon' and contains a form with the following fields: 'Enter title here' (text input), 'Social icons' (section header), 'Social icon*' (image input with a 'Select image' button), and 'Social link*' (text input). On the right side of the form are two panels. The 'Template Layout' panel has a dropdown menu set to 'Don't use a layout' and an 'OK' button, followed by an 'OR' separator and a button to 'Create a new template layout for Social icons'. The 'Publish' panel includes 'Save Draft' and 'Preview' buttons, and status/visibility settings: 'Status: Draft' (with an 'Edit' link), 'Visibility: Public' (with an 'Edit' link), and 'Publish immediately' (with an 'Edit' link). A blue 'Publish' button is at the bottom right of the form.

You need to set up:

Title: write a title, it will not be visible on the front end, is just a reminder for you.

Social icon: The image used for the Social Network. We suggest using **52px width and height** images.

Social Link: The page where the link on icon should take, e.g. <https://www.facebook.com/example>.

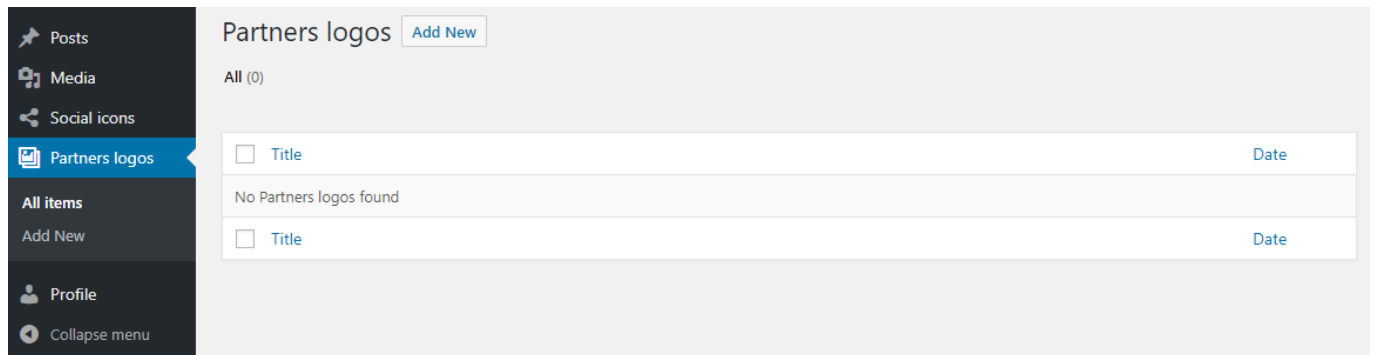

Then you can click on **Publish**, and the icon will be immediately visible on *Overview page*, at the end of the *Information* sidebar on the right.

8. Partner logos

In this section you will be able to add Logos to your partner.

There will not be any at the beginning, so the only action you can do is to add one.

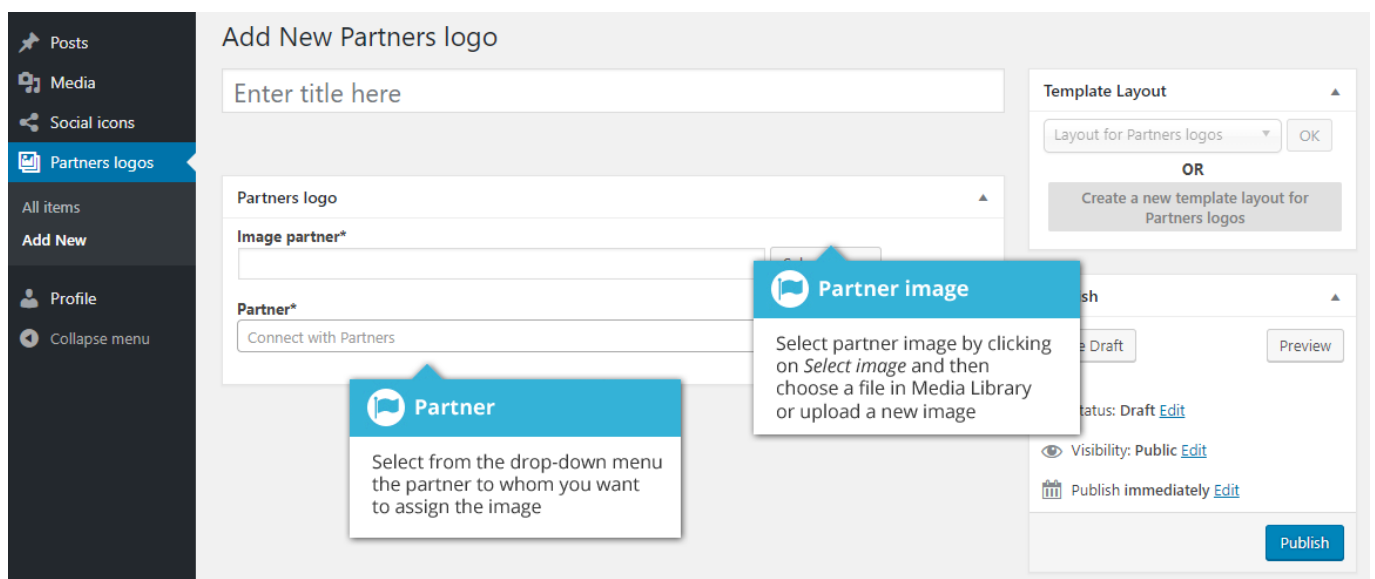

The **Partner logos** screen will look like this screenshot below.

Adding a New Partner logo

To add a new Partner logo, get over the **Partner logos** menu option in the left-hand navigation menu and in the fly-out menu, click the **Add New** link. Alternatively, click the **Partner logos** menu option and then click the **Add New** link underneath, or the **Add New** button at the top of the page.

You should see a page similar to the screenshot below.

You need to set up:

Title: write a title, it will not be visible on the front end, it's just a reminder for you.

Image partner: The image used for the Partner logo. We suggest using **300px width** images.

Partner: select the partner to whom you want to assign the image from the drop-down menu.

Then you can click on **Publish**, and the image will be immediately visible on *Overview page*, above the Partner Informations in the *Project partnership* section.
