

1 – Our Organization:

Department of Agricultural Sciences (DipSA)
Alma Mater Studiorum University of Bologna
<http://www.scienzeagrarie.unibo.it/en>

DipSA can offer a scientific-technologic support to the proposed project idea

2 – The project idea: SO 1.1

Support the Development of a Regional Innovation System for the Adriatic-Ionian Area

- Valorization of the traditional agrobiodiversity (semi-wild species, old cultivars, soil microbiodiversity) of the Adriatic coastal areas
- Organization of a modern network of small familiar, organic farms for the diffusion of the productions in local and transnational markets
- Support to sustainable modernization of the agriculture, maintaining the traditional organization, as well as the agricultural and soil biodiversity heritage

3. Ideal partners (all the eligible countries):

- Organizations of organic or conventional farmers
- Public Bodies
- Agriculture and/or Environment Ministries
- Research Institutions and Universities
- Touristic and regional associations interested in the promotion of local agricultural products
- Parks or other protected areas promoting High Natural Value (HNV) farming
